

Digital transformation and enhancement of QA procedures

iNakvis: developing an internal information system

Andrej Krček and Tilen Heco (SQAA)

History

- eNakvis information system started development in 2014
 - Developed by an external software company
 - Hosted on state infrastructure owned and managed by the Ministry of Public Administration
 - Too much bureaucracy
 - Slow development
 - Today used only by higher education institutions to submit applications in accreditation and evaluation procedures
-

Developing a new internal information system

- Start of development in 2019
 - Developed in-house by an SQAA employee
 - Custom built from the ground up
 - Hosted on SQAA server infrastrucutre
 - Avaliable only inside SQAA network to agency employees
 - Faster development
-

Features

- Tasks
 - Meetings
 - Accreditation and evaluation procedures
 - Analytics
 - Public records
 - Registry of experts
 - Employee time tracking
-

Connecting with external systems

- ZOOM
 - Ministry of Higher Education, Science and Innovation (eVŠ)
